ROQOS® ANNOUNCES THE FIRST GIGABIT INTRUSION PREVENTION SYSTEM FOR RESIDENTIAL MARKET

Roqos Core RC100 uses high performance hardware to provide cybersecurity solution at gigabit speed, along with VPN and parental control features.

Tysons, VA – October 26, 2018 – Roqos, the innovative leader of residential cybersecurity provider, has announced the long-awaited Roqos Core RC100 model for residential and small business markets. RC100, using multi-core 64 bit processor, is designed to support gigabit ISP speeds while providing Intrusion Prevention System (IPS) solution with more than 10,000 signatures.

"Gigabit Internet speeds by ISPs, simultaneously watched multiple 4K video streams, and the proliferation of IoT devices have created a growing need for gigabit cybersecurity solutions in residential market." said Sezen Uysal, founder and CEO of Roqos. "We have developed a new Roqos Core platform using high performance hardware to protect our customers from malware while providing internet access at gigabit speed".

Roqos, with the help of its cloud infrastructure, provides managed network service for comprehensive 24x7 cybersecurity protection by automatically updating software, configuration and security signatures on all Roqos Core platforms. Customers receive notifications when any suspicious Internet activity, ISP or VPN connection problem occur. Roqos also generates reports on Internet usage data by using a patent-pending technology.

Roqos Core RC100 platforms main features include:

- Intrusion Prevention with Deep Packet Inspection (DPI) at gigabit speed
- The fastest VPN router in residential market
- Simultaneous dual WiFi with 802.11n, 802.11AC modules and high gain external antennas
- Four gigabit Ethernet ports that can be used as WAN or LAN (coming soon)
- Rack-mountable metal chassis with front I/O ports

Roqos Core RC100 comes with one year Roqos Service which provides Roqos Global VPN service, Dynamic DNS, new software features, realtime notifications, customer support, hardware warranty as well as automatic software and security updates. RC100 is now available at https://www.roqos.com/residential.html.

About Roqos

Founded in 2013, Roqos, Inc. based in Tysons, VA, provides enterprise-grade cybersecurity, VPN, and parental/employee control services in the residential and small business markets. Roqos provides users with its proprietary high performance VPN routers, Roqos Cores, which are equipped with automatic software and security updates, as well as hardware warranty during the service term.
